## Products Needed

P&G Pro Line Carpet Spot Removers-  
General Use, Bio Spot, & Tannin Spot

P&G Pro Line  
Chewing Gum  
Remover

**FREQUENCY OF CLEANING:** Whenever spills or stains occur to remove spots, stains or gum / sticky residues..

**PREPARATION:** Collect all tools, equipment and products required. Review MSDS, product labels and caution statements. Choose appropriate safety equipment.

**SPECIAL DIRECTIONS FOR THIS TASK:** Do not spray spot or stain removers. Pre-test for colorfastness before use. Do not use if color is removed, faded or otherwise changed..

### STEP 1

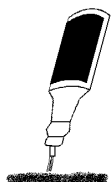

- Identify stain
- If stain can be identified refer to Spotter Chart to determine which spotter can be used.
- If stain is unidentified, start with General Use Carpet Spot Remover.
- If General Use Spotter is ineffective, use Bio Spotter.
- Choose Tannin Spotter if Bio Spotter is ineffective.

**NOTE:** Pre-test carpet spot removers for colorfastness before use. Do not use if color is removed faded or otherwise changed.

### STEP 2

- Remove solids with spoon or putty knife.
- Blot liquids with terry or paper towel.

### STEP 3

- Apply small amount of spotter around outer perimeter of stain, then fill in center until wet.
- Allow a few minutes for spotter to work.

**NOTE:** Do not spray spotters.

### STEP 4

- Agitate spot with blunt end of carpet brush, directing strokes from outside edge towards center of stain.
- Blot with clean, white damp cloth.
- Repeat Step 3 through Step 4 if needed.

### STEP 5

- Lightly spray area with clear water to rinse.
- Blot dry with clean, white cloth or paper towel.

### STEP 6

- Vacuum area when thoroughly dry.
